

# From the past to the future – towards a new paradigm in landscape and environment.

- A talk by Professor Brian Evans

*Professor Brian Evans will put the lessons from the recently published 'Growing Awareness: How green consciousness can change perceptions and places' (Brian and Sue Evans) in the context of 40 years of practice in Scotland and Ian McHarg's 'Design with Nature.'*

*He will explore the book's 10 point manifesto for the landscape and environment including the emergence of the 'ecophilic' in landscape design as a contemporary construct - a hypothesis that in Scotland is combined with the 'sublime' and the 'picturesque' to aid in Scotland's genius loci in the digital age of the 21st century.*

*To book your place please visit our Eventbrite page.*
